RESEARCH EXPERIENCE

Lateralization of Language Brain Networks: A Graph Theory Study

August 2021 – Present | Hangzhou, China

- Use graph theory to examine substantial lateralization in the topological properties of language brain networks and how they relate to behaviors
- Poster presentation at the OHBM 2022 Annual Meeting

Interpretable and Table-structured Abstractive Text Summarization

September 2021 – December 2021 | Hangzhou, China

- Develop a text summarization algorithm with higher interpretability and more controllable output based on structured tables

The Neural Mechanism Underlying Content-Context Binding in Visual Working Memory

June 2021 – Present | Hangzhou, China

- Explore a more effective behavioral paradigm to distinguish misbinding errors and informed guesses in the delayed recall paradigm by combining model fitting and individual reporting
- Analyze EEG signals to elucidate the neural activities closely related to feature binding in visual working memory

Spatial and Non-spatial Working Memory Recall Are Substantially Different: an Exploration Based on the Feature-binding Theory

May 2020 – February 2021 | Hangzhou, China

- Use the three-factor mixed response model (Bays, 2009) and the 2D recall model (Grogan et al., 2019) to fit behavioral responses
- Prove that the guessing rate is much lower in location recall tasks

A Simulation-Based Analysis of Fungi

February 2021 | Hangzhou, China

- Use the differential equation model and the cellular automata to simulate the interaction of different types of fungi
- Meritorious Winner in the Mathematical Contest in Modeling (MCM/ICM) 2021

INTERNATIONAL EXCHANGE EXPERIENCE

Deep Learning - Neuromatch Academy 2021 | PYTHON

- Project: Modeling Human Visual Process with Noisy Inputs

Computational Neuroscience - Neuromatch Academy 2020 | R

- Project: The Learning Mechanism of Foraging in the Perspective of Reinforcement Learning

ORGANIZATION EXPERIENCE

the Art department of Student Union of Zhejiang University | Member

- Organized and planned five activities such as New Year's Carnival Night and Top Ten Singers Competition, with more than 50,000 participants

Yinuo Yixing Public Welfare Service Team | Leader

- Organized four online exchange activities and two offline visits in Jiangxi province

SKILLS

PROGRAMMING

Experienced:

MATLAB • Python • C

Familiar:

Markdown • LaTeX • R

Understand:

HTML • VB

SOFTWARE/TOOLBOX

Experienced:

SPSS • MS Office • EEGLAB • Psychtoolbox

Familiar:

Photoshop • Audition • JASP • Signal Processing Toolbox

EDUCATION

ZHEJIANG UNIVERSITY

DEPARTMENT OF PSYCHOLOGY AND BEHAVIORAL SCIENCES | CHU

KOCHEN HONORS COLLEGE

Sep. 2019 - Present | Hangzhou, China

GPA: 3.96 / 4.0 (92.4 / 100)

Relevant Courses:

- Cognitive Psychology (100)
- Psycholinguistics (97)
- Experimental Design and Psychological Statistics (97)
- Artificial Intelligence and Machine Learning (96)

HONORS & AWARDS

- Chinese National Scholarship
- Zhejiang University Scholarship - First Prize
- First-Class Scholarship for Elite Students in Basic Sciences
- Scholarship for Leading Achievements

PERSONAL HOBBIES

- long-distance running
- writing (personal Wechat official account)
- play the piano & the guitar
